DOCUMENT ARRANGE	SELECT	MOVE	RESIZE	ROTATE
Paragraphs	Select words, then the whole paragraph.	Move paragraph before a heading.	Resize floated text; check reflow.	
Headings	Select title text, then the heading.	Move heading above the first paragraph.	Resize title width; check wrapping.	
Lists	Select one item, then the whole list.	Move list below the following text.	Resize list width; keep items readable.	
Details	Select Summary, then whole Details.	Move hint after the list.	Resize hint width with body open.	
Images	Select image without nearby text.	Float image left, then right.	Resize image; check proportions.	
Audio	Select player without starting audio.	Move player after a paragraph.	Change player width; keep controls usable.	
Video	Select clip without starting playback.	Float video beside the text.	Resize clip; keep playback controls usable.	
Website	Select embed without entering the site.	Move embed below a heading.	Resize frame; keep scrolling usable.	
Tables	Select a cell, then the whole table.	Move table above the image.	Resize table; keep cells readable.	
Graphics	Select one shape, then whole graphic.	Move graphic after the table.	Resize graphic viewport.	
Formulas	Select token, then whole block formula.	Move block formula after the text.	Resize block formula; keep content intact.	

GENERAL

RESIZE WINDOW

Narrow and widen the window; keep text and editing controls reachable.

ZOOM

Change browser zoom; check text reflow and selection placement.

PRINT

Open print preview; inspect captions and table breaks; cancel.

COMMENT

Comment on selected text; reply, edit the message and delete the thread.

GENERAL

RESIZE WINDOW

Narrow and widen the window; keep columns, cards and Add card controls reachable.

ZOOM

Change browser zoom; scroll between columns and select a card.

PRINT

Open print preview; inspect column wrapping and card clipping; cancel.

COMMENT

Comment on card content; move its card to another column and find the thread.

By mouse (or touchpad) By touch AI By AI

SETTINGS

- [ ] Open Settings; toggle Show style toolbox, close/reopen, then restore it.
- [ ] Set default layout to CANVAS; create a new document, then restore DOCUMENT.
- [ ] Add a word to the local dictionary, then remove the word.
- [ ] Open Commands; start a shortcut assignment, cancel, and check the original.

ISSUES

- [ ] Enable issue checking; check the text "This are a sentense."
- [ ] Use Retry after a loading failure; continue editing the document.
- [ ] Apply a suggested correction; check only the intended text changes.
- [ ] Dismiss an issue or accept its word; run the check again.

VERSIONS

- [ ] Make two edits; open Versions and inspect authors and change counts.
- [ ] Preview a past change; check ordinary editing is disabled in the preview.
- [ ] Return to the current document; check its content is unchanged.
- [ ] Restore an earlier change and inspect the resulting document.

DEVELOPER CONSOLE

- [ ] Open the console; pin/unpin it, switch tabs, then close and reopen it.
- [ ] Select a paragraph; edit Selected HTML and discard the draft.
- [ ] Edit Selected HTML again, Apply, and check the paragraph updates.
- [ ] Select a local package; inspect Metadata/Element and run Tests & Checks.

CROSS-FEATURE TASKS

- [ ] **MULTIMEDIA GUIDE**

  Create a DOCUMENT that teaches something you know. Combine headings, lists, a table, an illustrated example, audio or video, and a Details hint. Make the reading order and styling coherent; credit the sources and choose licenses.

- [ ] **VISUAL EXPLANATION**

  Use CANVAS to explain a process or compare ideas. Combine text, images, shapes and a formula or website. Rework the grouping, size, rotation and stacking until the explanation is clear both up close and at Fit content.

- [ ] **SHORT PRESENTATION**

  Build a SLIDES presentation for a new audience using material from your guide or canvas. Adapt copied content, add media, and revise the sequence and composition. Check that the story still works when you navigate it from start to finish.

- [ ] **PROJECT BOARD**

  Plan a real project in BOARD with useful columns and cards containing mixed content. Add priorities or supporting evidence, then simulate a change of plan by splitting, copying and moving work. Keep the board understandable at a narrow window size.

- [ ] **REVISE AND RECOVER**

  Take one of your documents through a substantial revision: change its structure, replace media, and rewrite a section. Use Issues to improve the text and Versions to compare and recover earlier work. Finish with the combination you prefer.
